CI
Pipeline

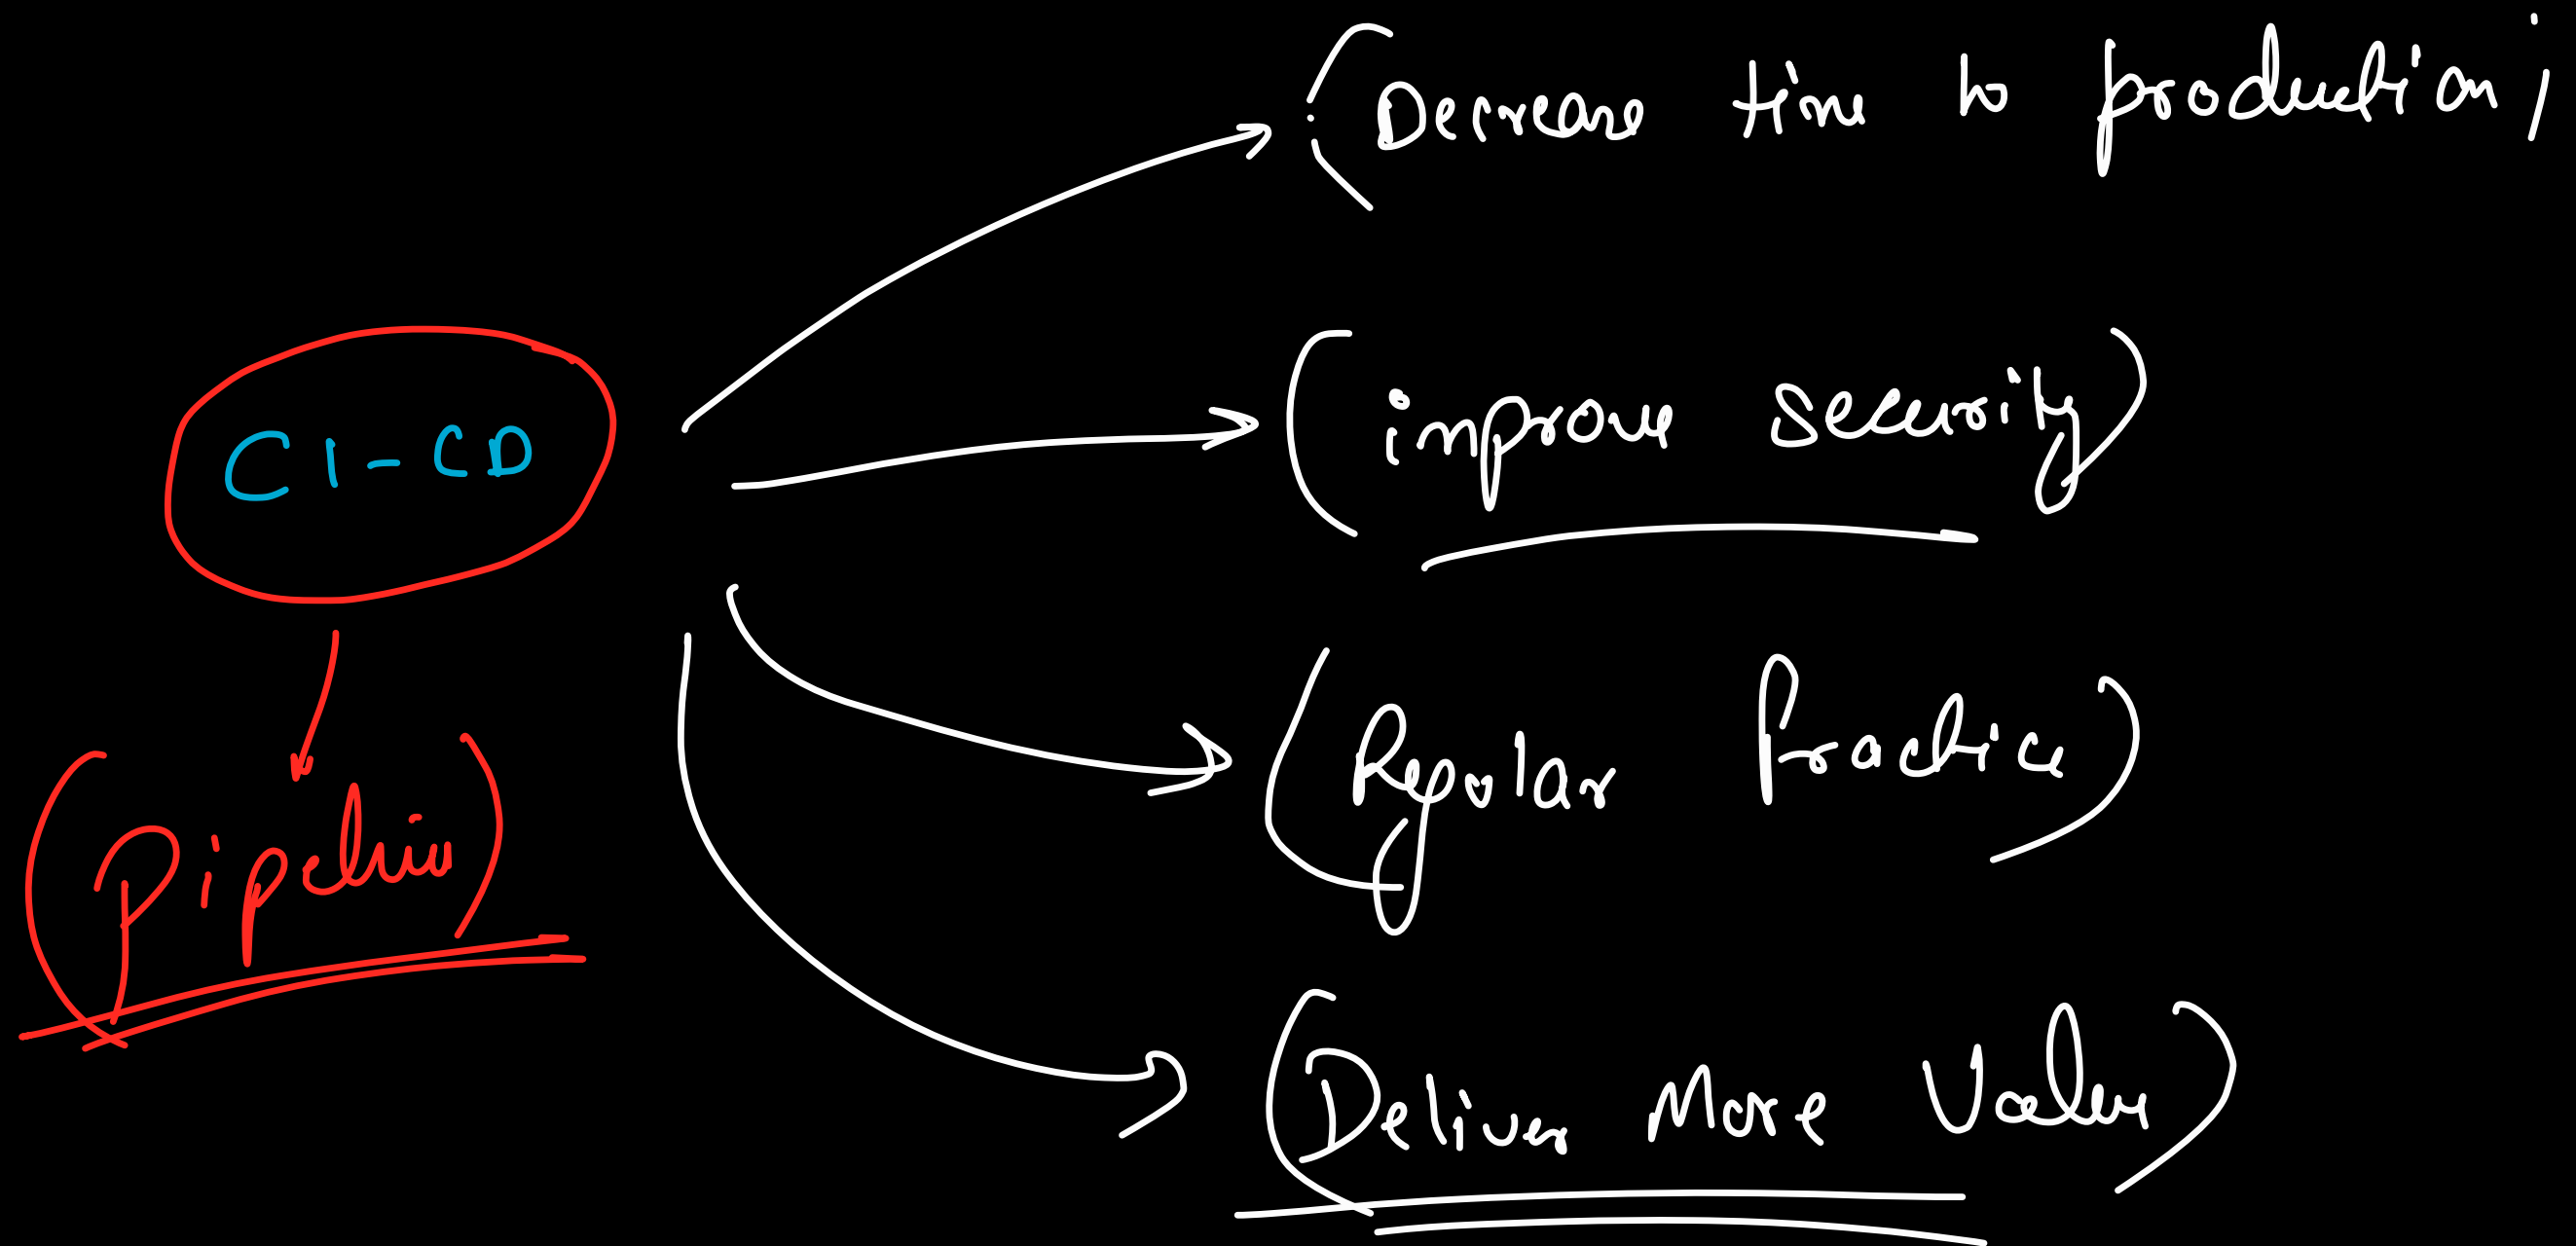

→ CI (continuous integration) aims to make it easier for developers to integrate their code changes easily.

→ It helps in improving the efficiency. Every time we submit the code, the CI system automatically builds & tests & checks everything to ensure that no errors occur or anything fails.

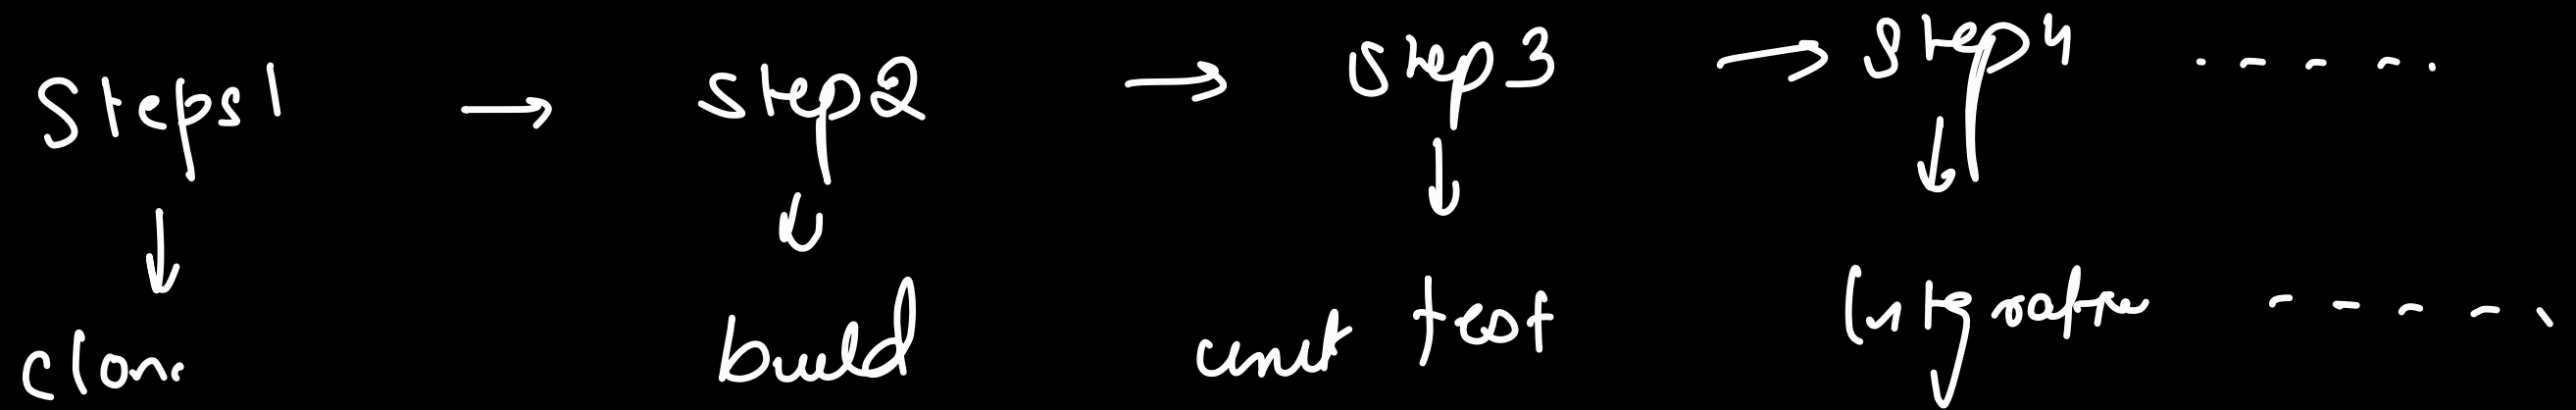

→ if there is anything breaking the CI will help us
to identify it early.

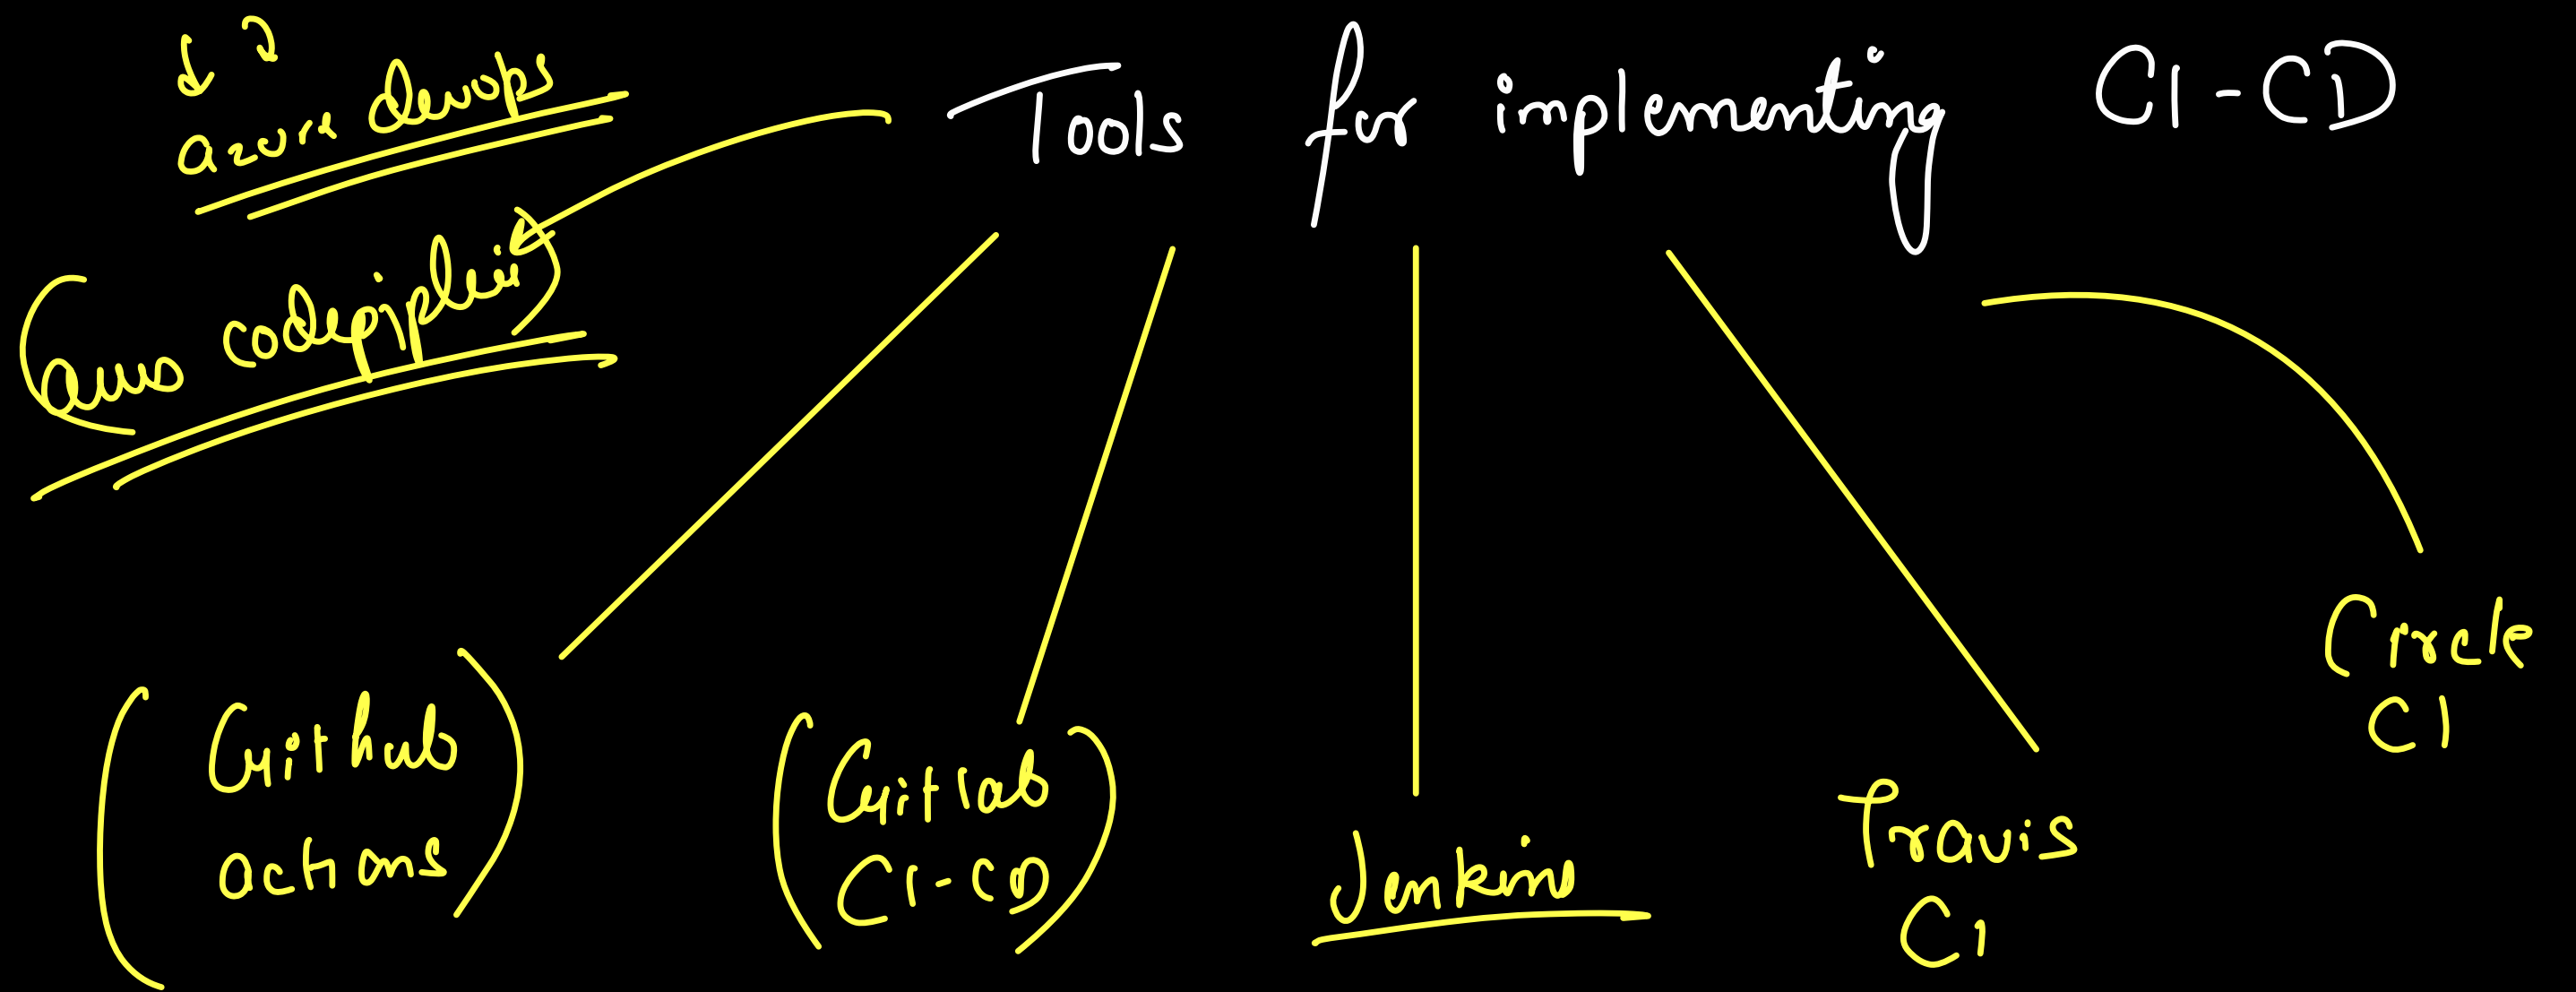

Continuous Delivery (CD)

→ A build pipeline is a sequence of operations & tools from source code to the deployed system.

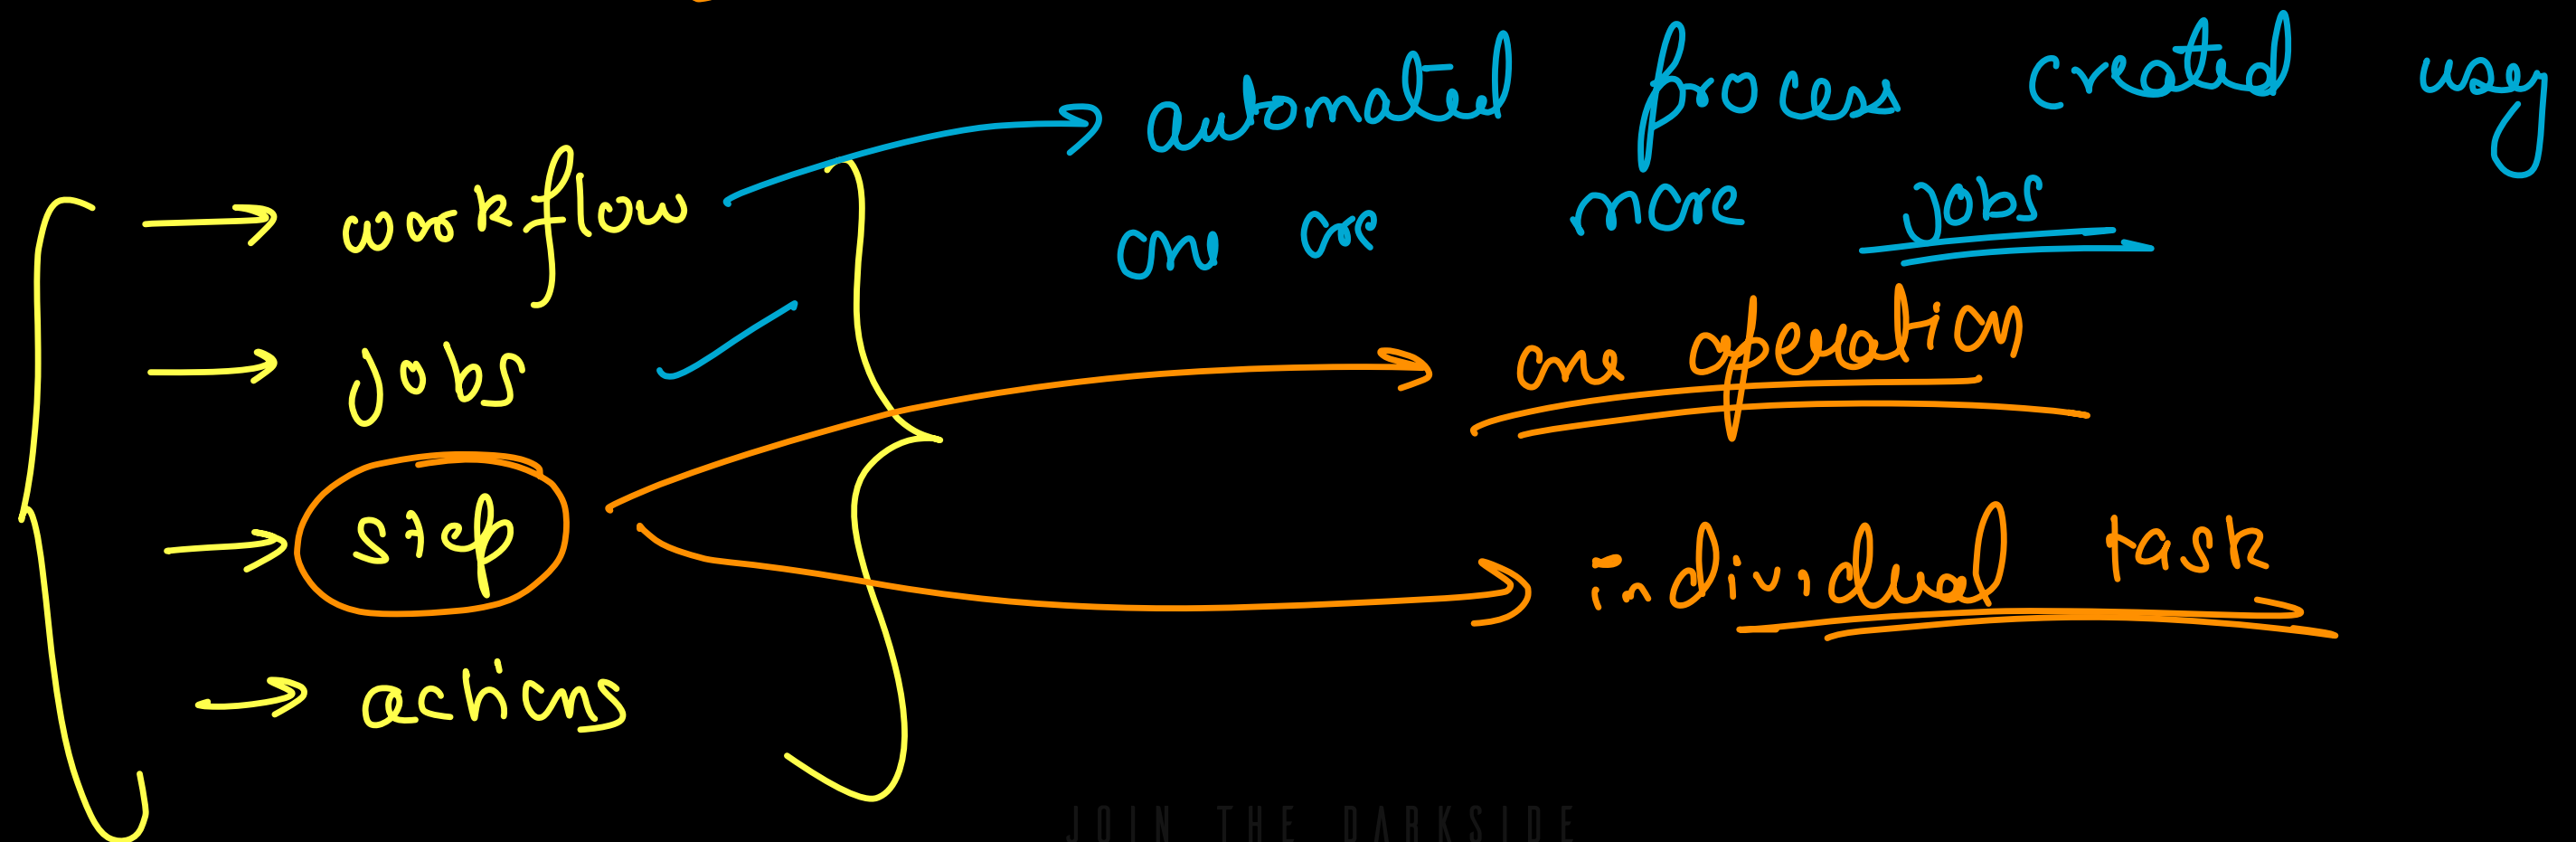

GitHub Actions

powerful automation tool integrated
in github.com.

you can setup automated workflows.

Jobs → it is a set of steps to be executed

↓
setup a pipeline that builds & tests a project.

→ checkout

→ nodejs

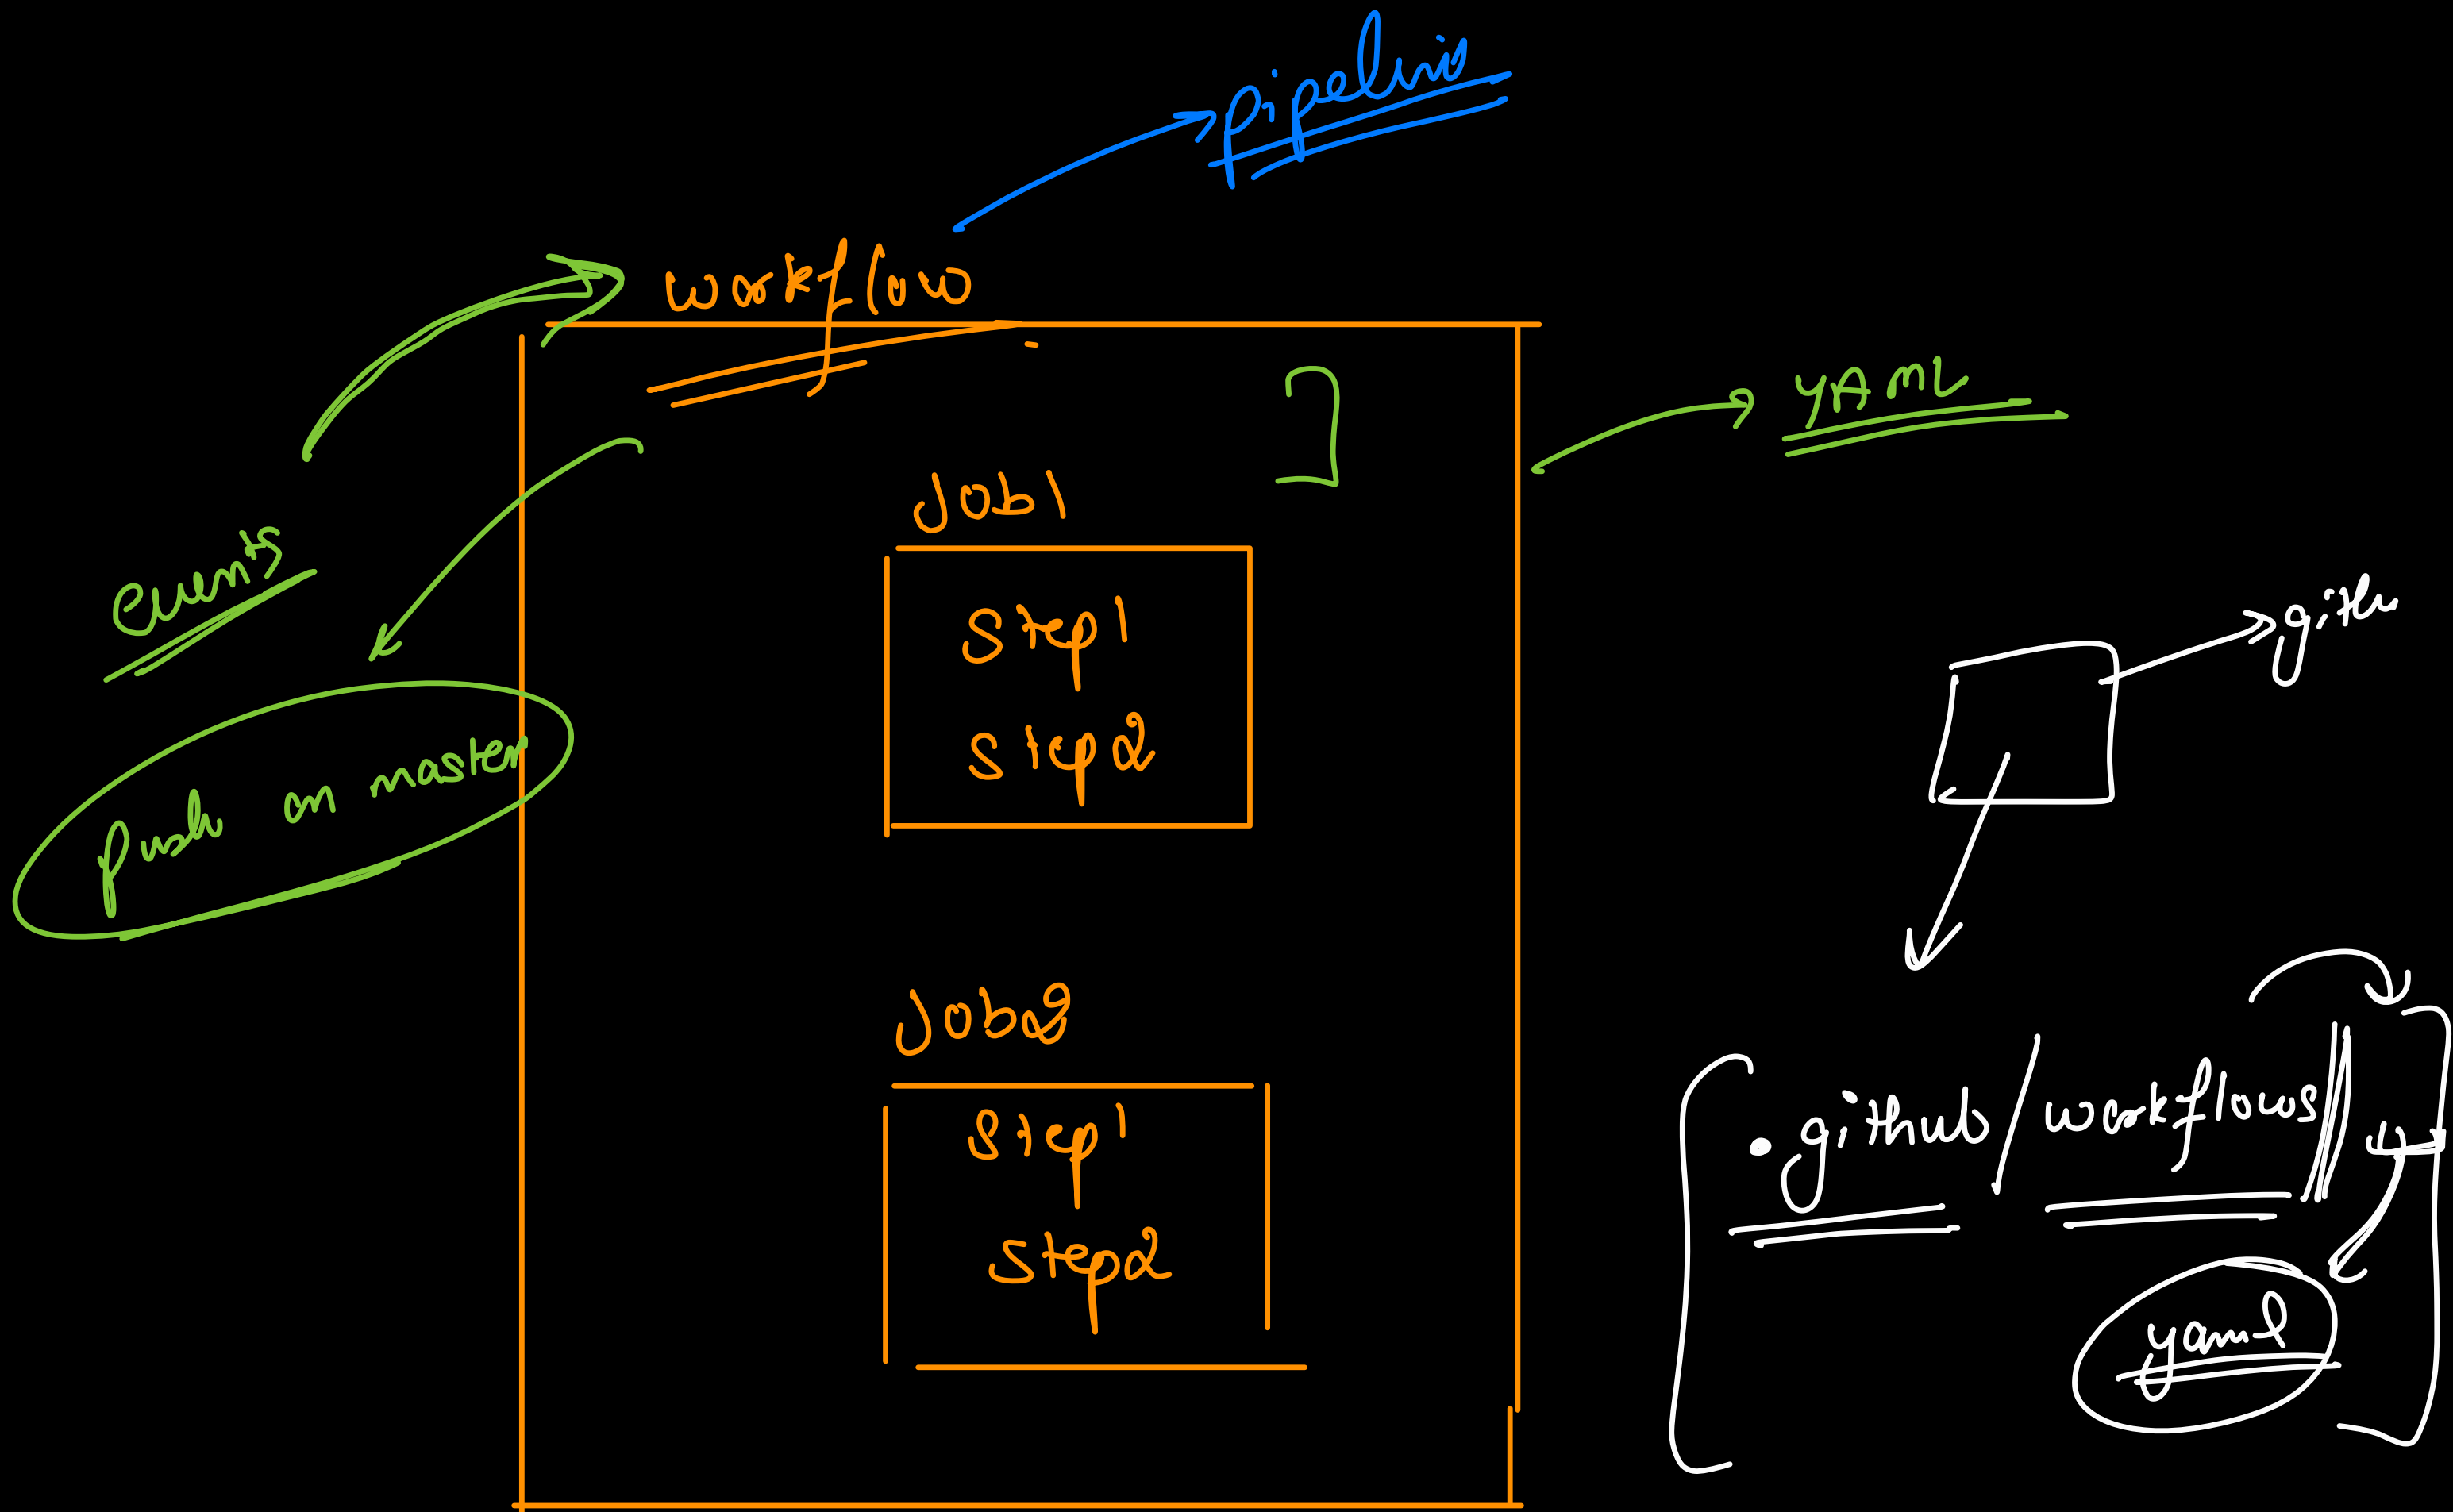

→ npm

→ build

→ run

→ test

name of the workflow
pipeline

whenever we push code on master / production branch

defining the jobs

```
1  name: "Hello world workflow"
2
3  # Controls when the action will run. Triggers
4  on:
5    push:
6      branches:
7        - master
8        - production
9
10 jobs:
11   hello_world:
12     runs-on: ubuntu-latest
13     steps:
14       - name: "Print hello world"
15         run: echo "Hello world"
16
17       - name: "Print current date"
18         run: date
```

whenever the event happens we will trigger the pipeline
event to trigger the pipeline

name of the job

defines the env of runner on which job runs

step 1

The screenshot shows the GitHub interface for the repository 'singhsanket143 / Sample-Github-Actions-Workflow'. The 'Actions' tab is highlighted in the navigation bar, with a red arrow pointing to it from a handwritten note. The repository is public and has 2 branches and 0 tags. The file list shows a folder '.github/workflows' and a file 'README.md', both added 2 hours ago. The README content reads: 'Welcome to the sample github actions workflow setup. Adedd first workflow'. The right sidebar displays repository statistics: 0 stars, 1 watching, and 0 forks. It also includes sections for 'Releases' and 'Packages', both indicating no published items.
