

→ workflow / pipeline

→ jobs

→ steps

→ command

- linux
- windows
- macos

→ github action commands

github action command is a pre defined operation  
that is done as a step in a job.

Project 1

P1

Project 2  
↓  
P2

Project-3  
↓  
P3

github actions → whole ecosystem workflows / jobs / steps

github action → predefined operation

Event  
whenever  
we push code  
on master /  
main branch

Steps

```
1  name: "Sample React CI Pipeline / Workflow"
2
3  on:
4    push:
5      branches:
6        - main ✓
7        - master ✓
8
9  jobs:
10    build-and-test:
11      runs-on: ubuntu-latest
12
13      steps:
14        - name: "Setup Node JS"
15          uses: actions/setup-node@v4
16          with:
17            node-version: '21'
18
19        - name: "Check node version"
20          run: node --version
```

linux command

name of the pipeline?

job name

env

Step 1

name of Step

helps to define github  
action

action  
for setting node.js

Step 2

```
1  name: "Sample React CI Pipeline / Workflow"
2
3  on:
4    push:
5      branches:
6        - main
7        - master
8
9  jobs:
10   build-and-test:
11     runs-on: ubuntu-latest
12
13     steps:
14       - name: "Setup Node JS"
15         uses: actions/setup-node@v4
16         with:
17           node-version: '21'
18
19       - name: "Check node version"
20         run: node --version
```

github  
machine

(predefined  
action)

CI

build

CD

event  
on which  
we  
trigger  
the pipeline

```
1  name: "CD Pipeline"
2
3  on:
4    workflow_run:
5      workflows: ["Sample React CI Pipeline / Workflow"]
6      types:
7        - completed
8    workflow_dispatch:
9
```

name of the pipeline

once our CI  
pipeline is  
completed

→ manual  
UI trigger

```

10 jobs:
11   deploy:
12     runs-on: ubuntu-latest
13     environment: production
14
15     steps:
16
17       - name: "Setup nodejs"
18         uses: actions/setup-node@v4
19         with:
20           node-version: '21'
21
22       - name: "Setup vercel cli"
23         run: npm install -g vercel
24
25       - name: "Download build files"
26         uses: actions/download-artifact@v4
27         with:
28           name: build
29           run-id: ${{ github.event.workflow_run.id }}
30           github-token: ${{ github.token }}
31
32       - name: "Deploy to vercel"
33         run: vercel --prod --token=${{ secrets.VERCEL_TOKEN }} --confirm --name=cicdproject
34

```

name of job

os

vercel env to run

nodejs

install vercel CLI

download the artifact

UI

run command

file name to download
